# Affordable Board Meeting Management Software

---

BoardCloud is a state-of-the-art board portal built on the latest Microsoft remote-work technology. It effortlessly manages virtual and hybrid meetings.

BoardCloud brims with innovation.

It is packed with features, including best-of-breed agenda builder, meeting analytics, SharePoint & Teams integration, voting, forms and document signatures.

# Directors are central

---

Our **primary goal** is to make directors lives easier and virtual meeting more cohesive. This has resulted in a collaborative real-time meeting surface. A meeting place where you can watch voting in real-time and chat with fellow meeting attendees in the meeting chat.

Our no-app approach allows directors immediate access to the agenda surface. We provide one-on-one director training that fits in with tight schedules.

Directors Interest and other members evaluation forms can be conveniently completed directly from meetings.

# Agenda Builder Extraordinaire

---

Of course, we did not forget all those hard-working board secretaries! Our best of breed agenda builder is designed to make meeting administrators smile. BoardCloud is **fast and snappy**, with drag-and-drop, templated agenda import for almost any kind of document.

---

Our live meeting surface synchronises changes in real-time, even during agenda building. It is designed to bind virtual meeting attendees with a synchronised meeting environment. Active Agenda enables company secretaries and meeting stakeholders to collaborate as they work together to shape and approve agenda.

## **The benefits don't stop there.**

For example, if a meeting administrator needs to update an agenda document during a meeting, the document will instantly update for all attendees. There is no need to distribute updated board packs at all attendees. Other real-time updates includes items such as voting, attendance and comments.

# Guest Are Welcome

---

Inviting guests to your meetings couldn't be easier. Guests are invited by email and have the meeting added to their calendars. When they join the meeting, they will only have access to the agenda section they have been invited to.

## Security

---

**Document Security:** BoardCloud offers enterprise level security. All documents are AES military grade encrypted and are unreadable by anyone (including us), outside of the application. File and committee names are also obfuscated and are illegible to humans.

**Board Pack Security:** BoardCloud is designed to operate without the need for distribution of board packs. This removes the risks of sharing sensitive company information via email. However, when required, meeting administrators can enable board pack downloading and printing, and PDF packs can be optionally be watermarked for additional security.

**Audit Trail:** All system access and user actions are logged in detail and can be reported on by period and by user.

# Additional Functionality

---

**Military Grade Encryption**

**Teams integration**

**State-of-the-art meeting analytics**

**Full-text Search of all published documents**

**Include You-Tube videos in-meeting**

**Integrated review process**

## Hosting & Technical

---

BoardCloud is available as hosted version on our cloud or as an Enterprise version, which can be installed your infrastructure. Self-hosted versions, require a Microsoft Server 2016 or above and a Microsoft SQL Server 2017 (or above) database.
